As the days of our last year
slip by all too fast,
We find ourselves recalling
special events and people.

Teachers who actually penetrated
our rebellious minds,
Friends who pulled us through
bad times,
Opponents who were determined
to put us down —
and sometimes succeeded,
All the individuality,
And all the conformity
That makes a high school
so full of memories.

You can help.

You've heard a lot about the need to conserve electricity and all forms of energy. Not only does conservation help save our nation's precious energy resources, it helps you and your family save money since the cost of energy is a big chunk out of most families' budgets. You can help your family by doing your part... make sure you close doors and windows when the heating or air conditioning unit is on; don't "graze" when you raid the refrigerator - know what you want before you open the door; hot water takes energy - try a shorter shower; and make sure the television or stereo is off when you're through with it. Work with your family to save energy now... you'll help make sure there will be enough for everyone when you start a family of your own.
